The Honorable Marc Shulman, Chair  
House Consumer & Industry Services Subcommittee  
Michigan House of Representatives  
P.O. Box 30014  
Lansing, Michigan 48909

Dear Representative Shulman:

Attached please find a report on the distribution of funds for the Low Income/Energy Efficiency Assistance Program. Section 335 of P.A. 527 of 2002, requires the Public Service Commission to provide all members of the appropriations subcommittees and senate and house fiscal agencies with this report.

This report, and this notification, have been posted to our web site under "Inside CIS" at the following address: <http://www.michigan.gov/cis/>.

If you have any questions regarding this information, please feel free to contact me at 335-1976.

Sincerely,

*Allan R. Pohl*

Allan R. Pohl

**REPORT  
ON  
THE LOW-INCOME AND ENERGY EFFICIENCY FUND**

Michigan Public Service Commission  
Department of Consumer and Industry Services  
June 1, 2003

## **Low-Income and Energy Efficiency Fund**

### **June 1, 2003**

The Customer Choice and Electricity Reliability Act of 2000, 2000 PA 141, authorized the creation of a Low-Income and Energy Efficiency Fund, administered by the Michigan Public Service Commission. The purpose of the fund is to provide shut-off and other protection for low-income customers and to promote energy efficiency by all customer classes. The fund results from securitization savings that exceeded the amount needed to achieve a 5% electric rate reduction for residential and business customers. Section 10d(6), MCL46010d(6) specifies the use of a portion of the savings:

If securitization savings exceed the amount needed to achieve a 5% rate reduction for all customers, then, for a period of 6 years, 100% of the excess savings, up to 2% of the electric utility's commercial and industrial revenues, shall be allocated to the low-income and energy efficiency fund administered by the commission. The commission shall establish standards for the use of the fund to provide shut-off and other protection for low-income customers and to promote energy efficiency by all customer classes.

The Detroit Edison Company is the only electric utility whose securitization savings exceed the amount necessary to fund the rate reduction required in the Act and is the only company contributing to the Fund. On July 25, 2002, Governor John Engler signed the Department of Consumer and Industry Services appropriations bill for 2002-2003, Public Act 527 of 2002, which authorized \$57 million for the Fund and required that the Commission report by June 1, 2003, on the distribution of funds. The \$57 million appropriation reflects an estimate of the annual revenues that could accrue to the Fund. Actual remittance, which occurs monthly, totals approximately \$3.6 million per month or about \$44-46 million annually. As of May 3, 2003, Detroit Edison had remitted \$87,357,848 to the Department of Consumer and Industry Services.

### **Procedural Framework**

On November 20, 2001, the Commission issued an Order setting the procedural framework to administer the Fund. Based on the Act, the Commission stated it expected the annual disbursement for each of the six program years to fall into three broad categories:

- 1) Energy assistance for low-income customers;
- 2) Conservation and energy efficiency measures targeted toward reducing the energy use and energy bills of low-income customers; and
- 3) The development of energy efficiency programs that benefit all customer classes.

The Commission determined that approximately 75% of the grant monies awarded would be allocated to providing low-income energy assistance and low-income energy efficiency programs and 25% would be allocated to the development of energy efficiency programs to benefit all customer classes. The Commission also stated it intended to set aside a portion of the proceeds to create an endowment to finance programs that assist low-income customers and support energy efficiency projects beyond the six-year existence of the Fund. The Commission stated that it would follow the procedures established by the Department of Management and Budget and the Department of

Consumer and Industry Services in issuing requests for proposals, making disbursements and managing the grants.

### **Grant Awards**

To date, the Commission has issued orders approving five rounds of grants from the Low-Income and Energy Efficiency Fund, totaling \$84.6 million. The first three rounds of grants were awarded in Fiscal Year 2001/2002. The fourth and fifth round of grants have been awarded in Fiscal Year 2002/2003. The grants have been awarded as follows: 1) \$27.4 million to provide low-income energy assistance; 2) \$12.2 million to develop or improve energy efficiency technologies; 3) \$5,024,985 for low-income, energy efficiency projects; 4) \$20 million to provide low-income energy assistance and 5) \$20 million to provide low-income energy assistance.

### **Round One**

On February 21, 2002, the Commission approved grants totaling up to \$27.4 million to provide low-income energy assistance to the following organizations:

- Family Independence Agency -- \$12 million to provide supplemental payments to households receiving the Home Heating Credit and \$3 million to expand the State Emergency Fund through Community Action Agencies;
- Michigan Community Action Agency Association -- up to \$3,110,000 to provide a 2:1 match for funds raised locally through the Walk for Warmth;
- The Salvation Army -- \$3 million to serve households statewide ineligible for assistance from FIA or for whom such assistance is insufficient or not available;
- The Heat and Warmth Fund -- \$2 million for the THAW Safety Net Program in sixty existing sites in southern Michigan;
- Newaygo County Community Services -- \$45,675 to assist households in Newaygo County ineligible for assistance from FIA or for whom such assistance is insufficient or unavailable;
- Wayne Metropolitan Community Action Agency -- \$212,987 to provide assistance to households in out-Wayne County facing shut-off of energy services;
- Leslie Outreach, Inc.-- \$34,109 to provide assistance to households in the Leslie, Stockbridge, and Dansville school districts;
- Family Independence Agency -- \$4 million for energy assistance special needs and other energy assistance priorities throughout the State of Michigan.

### **Round Two**

On July 23, 2002, the MPSC approved grants totaling nearly \$12.2 million, to be used to develop or improve energy efficiency technologies as follows:

- Michigan Economic Development Corporation-- \$4.2 million to assist in the design, construction and installation of a microgrid system to power, through the use of distributed generation and other means, the NextEnergy Center and NextEnergy Zone;
- Grand Valley State University-- \$3 million to establish the Energy Center of Excellence to develop, improve and demonstrate energy efficiency technology applications;

- Michigan Technical Education Center at Bay de Noc Community College-- \$2 million to establish the "Northern Lights" revolving loan fund, designed to assist businesses, school districts, and local governmental agencies in undertaking energy efficiency improvements and pay for upgrades through energy savings;
- Ford Motor Company-- \$1.3 million for the development and testing of a process via construction of a full-size prototype, designed to capture and destroy volatile organic compounds by using those compounds as a source of fuel cell energy;
- Sordal Incorporated--\$584,448 to design and build machines capable of producing a non-flammable, light weight insulation material in a shape and size necessary for widespread industrial, commercial and residential use;
- DTE Energy Technologies, Inc. -- \$395,000 for the installation and operation of a three to four unit combined heat and power fuel cell system for demonstrating usefulness of combined heat and power fuel cells;
- EnSave Energy Performance, Inc.--\$385,805 to fund rebates of \$500-\$1000 on the purchase and installation by Michigan dairy farmers of variable speed drive systems;
- Intellicon --\$275,000 specialized "grid intelligence" software allowing utilities and other electric transmission companies to identify ways to increase the electric flow capacity on their grids and reduce the probability, frequency and scale of brownouts and blackouts;
- STM Power, Inc. -- \$53,200 installing, operating, maintaining and Beta testing a 25 kilowatt combined heat and power-based distributed generation unit to be located in a Belleville landfill.

### **Round Three**

On August 20 and September 16, 2002, the MPSC approved grants totaling \$5,024,985 for low-income, energy efficiency projects.

- The Community Economic Development Association of Michigan -- \$203,840 for Build Michigan, a program to influence organizations building affordable housing to build healthier and more energy efficient structures;
- Consumers Energy Company -- \$351,500 for an education campaign targeted at qualified low-income customers throughout its gas and electric service territories and a follow-up survey to validate energy savings;
- Metro Neighborhood Housing and Community Development -- \$987,500 to improve the efficiency of homes in Detroit, Flint and Saginaw by providing home energy audits; energy efficiency upgrades; training for contractors, homeowners, community groups, and students, and program evaluation;
- The Michigan Community Action Agency Association -- \$2,700,000 to enhance the existing statewide Weatherization Assistance Program with expanded and enhanced energy efficiency measures and client education;
- Nova Development Group -- \$506,145 for energy conservation measures dispersed to multi-family affordable housing units in Michigan;
- The United Way Community Services/Nonprofit Facilities Center -- \$250,000 to expand its planning, workshops, and grant making practices to include a special incentive program directed to nonprofit housing organizations that maintain a minimum of six housing units for persons or households that qualify as low-income;

- Washtenaw Affordable Housing Corporation -- \$26,000 for an energy efficiency retrofit of a low-income apartment building and enhancement of residents' conservation awareness.

#### **Round Four**

On December 20, 2002, the MPSC approved grants totaling \$20 million for low-income energy assistance.

- Family Independence Agency (FIA) -- \$12 million to provide supplemental payments to households receiving the Home Heating Credit and \$1.5 million to expand the State Emergency Fund in cooperation with community action agencies;
- Salvation Army -- \$3 million to serve households statewide ineligible for assistance from FIA or for whom such assistance is insufficient or not available;
- MCAAA -- \$2 million in a direct grant for low-income energy assistance;
- THAW -- \$1.5 million for the THAW Safety Net Program.

#### **Round Five**

On February 27, 2003, the MPSC approved grants totaling \$20 million for low-income energy assistance.

- Family Independence Agency (FIA) -- \$17 million to expand the State Emergency Relief Fund;
- Salvation Army -- \$1 million to serve households statewide ineligible for assistance from FIA or for whom such assistance is insufficient or not available;
- Michigan Community Action Agency Association -- \$1 million in a direct grant for low-income energy assistance;
- The Heat and Warmth Fund (THAW) -- \$1 million for the THAW Fund.

The Commission approved these grants, totaling \$20 million, in response to an immediate need for additional low-income energy assistance. The Commission took this action, because of a number of circumstances, including the state's budget, very cold weather, the economy, the elimination of the Family Independence Agency's positive billing program, and an increasing occurrence of utility service shutoffs. The Department of Consumer and Industry Services entered into an interdepartmental agency agreement for the Family Independence Agency grant. The Salvation Army, Michigan Community Action Agency Association, and the Heat and Warmth Fund grants were submitted to the State Administrative Board for review at its March 18, 2003 meeting which was the earliest meeting following the Commission order.

#### **Evaluation**

The Commission requires grantees to provide data on program accomplishments and problems encountered in completing grant requirements. This information is used to determine if the grantees accomplished the objectives stated in their proposals and resulting grant agreements. This information will also be used to assess if and how the distribution of funds should be modified in the future.

Michigan Public Service Commission staff will conduct a financial audit of select grants in 2003 to enhance the MPSC's oversight of the Low-Income and Energy Efficiency Fund grant program.

Attachment F summarizes the grants approved by the Commission, the amounts disbursed to date, and the balances remaining for each grantee.
